

Good afternoon Wendy, Heidi,

Updates on SCE's Rush Creek Relicensing Project may be found at <https://www.sce.com/regulatory/hydro-licensing/rush-creek#stayinformed>. This website includes all of the information about the relicensing process description, documents, schedule, public meetings, etc. The project is currently in the process of conducting technical studies per the attached timeline and study plan determination, which is why I believe, there has been nothing to report. If individuals are interested in participating in the relicensing proceeding, they may complete the **Contact Registration Form**. This will ensure they are included on the distribution list and will receive future relicensing proceeding communications and meeting notifications. They may register online [here](#) to be notified via e-mail of new FERC filings, e-comments, and issuances related to the Rush Creek Project.

**V/R**
